

SL-7 EXPO

We built speed. Now let's build the future.

THE ISSUES

America's Maritime Crisis

The U.S. once led the world in shipping innovation — but today, maritime careers are overlooked and misunderstood.

Fewer young people are entering the industry, and the nation faces a severe mariner shortage.

Museum ships celebrate the past but none show how vital modern maritime work remains for trade, jobs, and national security.

The industry deserves Smithsonian-level visibility.

THE PROJECT

The SL-7 Expo

A visionary plan to turn one of the legendary SL-7 class ships — the fastest cargo vessels ever built — into a Maritime Industry Expo Center.

Not a museum, but a living showcase of today's intermodal shipping and maritime careers.

A hub for innovation, learning, and events — complete with interactive exhibits, simulators, and a working waterfront atmosphere.

A national platform to connect industry, education, and the public.

GET INVOLVED

Support Maritime Revival

Follow and share:
